SUMMARY

Driven and detail-oriented Software Development Engineer with proficiency in Java, and JavaScript, along with hands-on experience in full-stack web development. Seeking an opportunity to leverage my skills in building scalable and efficient applications while contributing to innovative solutions and driving business impact through technology.

TECHNICAL SKILLS

- **Programming Languages**: Java, JavaScript, TypeScript, SQL

- **Development**: MongoDB, Express, React, Node, Firebase, AWS

- **Libraries & Tools**: Socket.io, Web Tokens, MaterialUI, Tailwind, Git, Docker

- **Fundamentals**: Data Structures and Algorithms, DBMS, OOPS, Computer Networks

EXPERIENCE

Junior Software Engineer Intern   January 2025 – Present
EPAM Systems   *Hyderabad, India*
- Mastered JavaScript fundamentals and applied them to build scalable applications, improving code efficiency by 30%.
- Engineered and optimized frontend applications using React.js, Tailwind CSS, and Material-UI, reducing load time by 35% and enhancing UI responsiveness.
- Implemented backend APIs using Node.js and integrated AWS services (e.g., S3, Lambda), improving application scalability.
- Collaborated with UI/UX teams to enhance design and refactored React components, reducing render time by 20%.

PROJECTS

Chatwave - Chatting site   May 2024 – June 2024
Repository-Link — Site-Link   *MongoDB, Express, React, Node, Socket.io*
- Designed a live-chatting application enabling user login and real-time communication.
- Built a fully responsive UI using React.js and Tailwind CSS, ensuring seamless user experience across all device sizes.
- Developed group chat features and a dynamic light/dark mode, increasing user engagement by 25%.
- Mastered MERN stack technologies and used libraries such as JWT, MUI, and Socket.io to enhance application features.

Joboard - Job Tracking Portal   January 2024 – February 2024
Repository-Link — Site-Link   *React, Tailwind CSS, Firebase*
- Engineered a job tracking portal to streamline the search for the latest job openings, improving user job search efficiency.
- Implemented an advanced job search feature with filters using React hooks and Firestore, improving job search accuracy.
- Designed a job posting system using Firestore, reducing database write latency by 20% and improving posting efficiency.
- Developed a scalable job tracking system using React hooks and Firebase, improving data retrieval speed by 30%.

EDUCATION

GL Bajaj Institute Of Technology And Management   Greater Noida, India
B.Tech in Computer Science, Artificial Intelligence and Machine Learning, 8.1/10   *Expected Graduation – July 2025*

Anand Bhawan School   Barabanki, India
Intermediate, 8.5/10   *March 2018 – June 2020*

CERTIFICATIONS AND ACHIEVEMENTS

- Solved over 900 DSA problems on LeetCode   Present
- Complete 2023 Web Development Bootcamp - UDEMY   November 2023
- Smart India Hackathon, College level Finalist   November 2023
- AWS Academy Graduate - AWS Academy Cloud Architecting   October 2023
